Gang - Here it is, someone with an R-390A, a downconverter to  
~13 kHz, pc sound card and from there on out it's all in software.

I take the IF from mine and run it into the ext RX  
of my 756 Pro.... But then again, not everyone has  
a 756 pro.... ;-)

Greetings

The virus free attachment contains some test equipment, components and misc. stuff I have for sale.

All prices are + shipping from 55744. I would like to ship using Fedex or USPS. Will ship UPS if you insist, at your own risk. MO or personal check is OK. I do not take XXXpal. I will have to wait for personal checks to clear unless I know you or/and the amount is trivial.

Will ship anywhere overseas except NK, Libya, or Iran. Shipments to Mars will have to wait for the next planned mission and it's gonna cost ya big time :-)

Sorry no pix.

The S-Line cab., vacuum caps & bandswitch are already gone.

Regards

There is possibly some hope for cleaning up your Ranger. Most factory paint is baked on for toughness and durability and factory baked finishes will withstand some cleaning with solvents. Most likely the Johnson has baked enamel too but I don't know for sure that it does. You should test the following recommendation on an inconspicuous area first to make sure it is safe to proceed. When you are dealing with the original baked enamels you can usually clean them with a shop cloth wetted with lacquer thinner or acetone. The original paint will not be affected but the cheap spraypaint certainly will as it will wipe right off. This may not be true in the case of Johnson equipment because I have never tested one to know for sure if the factory baked the paint, perhaps someone who knows will write. In any event you should proceed with caution to make sure you are not removing the original finish, just the unwanted gold spraypaint.

Regards, Greg

Have an upcoming trip to St. Petersburg , FL.  
Are there any surplus electronics, ham stores, boatanchor  
haunts, etc etc worth visiting while I'm in the area ???  
Tampa and Clearwater areas would be within my range also.  
Thanks and 73,

I picked up a nice RAK receiver at the Princeton, IL hamfest and now I have  
the "regen fever" and would like to find an RAL to go with it. Power supply  
would be nice but not necessary. Given the weight I would love to find one  
within a couple hundred miles of Central IL or one I could pick up on the  
way to the Tennessee mountains later this summer. In any case, if you have  
one you would like to sell please let me know.

It seems our tech support people decided to go formal when they updated Microsoft Outlook so professional titles were added to our names. Since my doctorate is in business I can be of no assistance with medical problems-well actually my specialty is international marketing so I guess I could do consulting in international organ sales :) In any case, I prefer just plain Rodger (who is still looking for an RAL receiver)

The following is a retype in ascii of a message I received from David,  
w6pss.

Jim, W8KGI

The following appeared in my return email from Ray Osterwald, N0DMS, Ed. of  
ER: "...Barry and Shirley are returning to Canada next month ..." A call  
later to Barry revealed their Colorado property was already in escrow. He &  
Shirley plan to live in Victoria on Vancouver Island, BC. They'll soon be  
in the market for a seaworthy sailboat capable of sailing the Juan de Fuca  
Strait. But they'll require sailing lessons first - hi. They want to visit  
the many islands between Washington State & BC "Of course it'll be equipped  
with ham gear in order to keep in touch with our many radio friends."  
That's you!

I suggested to Ray that we each send farewell comments to ER Headquarters  
ASAP. Ray responded, "What a great idea! Please make the announcement on  
the AMI nets and I'll MAKE room for anything which comes in." Wow! Please  
everyone, let's give Barry & Shirley a real send off by expressing our  
thanks and appreciation for their untiring effort to unite scores of  
amateurs & radio buffs via Electric Radio Magazine which they alone created.  
Net Control stations are requested to spread word by suggesting their net  
members utilize either email or snail mail for that purpose. Herewith email  
ad. ER@OfficeOnWeb.Net , Tel. 720-924-01712, Electric Radio, PO Box 242,  
Bailey, CO 80421-0242.

Thanks each of you and thank you Ray for welcoming these welfare comments  
for publication in the next issue of ER.

73,  
david  
w6pss

Subject: ADMINISTRIVIA: Changing Email Addresses  
Date: Thu, 17 Jun 2004 11:15:00 -0700 (PDT)

Gang-

This periodic post is intended to help subscribers whose email address has changed, preventing posting or receipt of the list.

If you change ISP (InterNet Service Provider), simply send me an email advising the change, and I will do my best to implement the change quickly.

For those unfortunates, whose ISP has made a change without advising their customers of the potential impact of that change on subscribers to email lists like the boatanchors, where one must be a subscriber to post to the list, try to follow along...

Under some circumstances, the changes to your email address are "transparent" to you, but prevent posting. I get error notification for these kinds of problems, and I try to work them out. However, I may miss one, and on this end, the process is anything BUT automatic.

You have a bigger stick than I do. You and your ISP have the primary responsibility to repair the problems caused by the change at the ISP. I have zero leverage with your ISP, and you have great leverage.

Most ISP maintain a customer service department to help with problems like these. This should be your first line of support for email problems. I am happy to assist and consult, but try to understand that when your ISP makes a change to their email handler, and that change prevents you from posting to the boatanchors list, I can help, but resolving this problem is your responsibility, working with your ISP. I am but a volunteer, contributing my time to administer the list.

Thank you for your attention.

Content-Type: text/plain; charset=us-ascii  
Content-Transfer-Encoding: 7bit

Dear Crypto Machine Aficionado,

Today I established an unmoderated mail list on Yahoogroups for those folks whose interest lies in the area of preserving vintage crypto machines and exchanging ideas on this subject. There is no SPAM on this list and I have disallowed any attachments so viruses won't be spread. Please propagate this e-mail to anyone who might find it of interest. In addition, I will advertise this list on my Crypto Machines web page. <http://webhome.idirect.com/~jproc/crypto>

It will take a bit of time to build up a group of active posters so I

will test the waters by posting "seed" messages occasionally until the list starts to sustain itself.

\*\*\*\*\*

To Subscribe

Sent blank e-mail (both body and subject field) to:  
cryptocollectors-subscribe@yahoogroups.com

To Unsubscribe:

Sent blank e-mail (both body and subject field) to:  
cryptocollectors-unsubscribe@yahoogroups.com

Once enrolled, you will get a welcome message from the group . After that, simply post e-mail to: cryptocollectors@yahoogroups.com and the group will receive the message.

Hello

I am looking for the following books to add to my collection.

"Antennas" by Kraus  
"Elements of Radio" by Marcus & Horton (latest edition)  
"Radio Manual" by Sterling  
"Antenna Engineering Handbook" by Jasik  
"Vacuum Tube Circuits" by Sienkiewicz  
"Communication Receivers" The Vacuum Tube Era by R. S. Moore  
"Communications Receivers Principles & Design" Rohde & Bucher

Please respond with condition, edition # if any, last year published or

printed, and of course your asking price.

Cheers

Orrin Bentz

Anchorites:

I have set out to build a BA transmitter from the 1949 ARRL handbook, by =  
the book, that specifies a B&W coil: #3016: 1"DIA, 32TPI, 24 Ga wire.

This item has proven particularly difficult to find from all the usual =  
sources, so I now fall back on soliciting the Anchorites to scan their =  
Junque Boxes to see if there remain ANY of these beasts therein.

Alternatively, I consider winding my own. Many schemes suggest =  
themselves, but several questions present:

    Can anyone opine on how B&W wound such delectate air core inductors?

    Has anyone tried to wind (& succeeded in winding ) their own?

Please Advise.

George and fellow Anchorites,

Homebrew Miniductor info can be found at:  
<http://www2.arrl.org/tis/info/homebrew.html>  
from August, 97 "QST" article by Robert H. Johns, W3JIP.

Although plastic pipe as used in this article for forms does not come in even sizes as does Miniductor, plastic tubing from model construction or pill bottles come in sizes that may be close to what you need.
